To whom it may concern

10 years ago we would have said
yes to your project but today 40 feet
down from that time how can you spend
\$650 million to get water from a lake that
has mud flats and a stream at this end.
No meetings in our area? No wonder why
you did not want to see what we see.
Mud that deer are trying to get to the water
to drink and sink into. Very sad to see.
We have 40 miles of shore line we can't
get to fish in.
