To whom it may concern:

I strongly disagree with your plan to drill wells in the Ottertail and Pelican Areas of Minnesota and pump it to Fargo in a drought situation. My family makes their living selling Real Estate in this area and believes this plan would lower property values in this entire area. Our water and lakes are the Natural Resources that make our community strong. I realize the importance of industry to the Red River Valley but taking what makes our area progressive and transferring it to another somewhat reminds me of the kind of actions our country fights wars over in the past to stop. We love our friends to the west and are there helping them battle the problem of having too much water as I type this email. But giving up our livelihood so they can expand is not my idea of what happens in a free country.

One comment at the meeting in Perham regarding not tapping an aquifer southwest of Fargo because it may disrupt an endangered species really makes me believe this entire plan has not been thought out.

Please give this more consideration before you do something that may potentially ruin a community.

Sincerely,
Nancy Dockter
