

① 3/21/06

Sw After reading the St. Paul paper Mr. B on the idea of tapping Lake of the Woods for water Red River Area, I see several reasons for not doing it. 1st of all the Red River flows north to Lake Winnipeg that's bad. Lake of the Woods is Canadian waters also. They also would have to permit its international problem. My answer is to pump it out of Missouri River & Devils Lake. I know of Bath Area. Devils Lake has increased 10 times or more in the past year

②

Some farms have been irrigated by the rising Devils Lake, they can not find the reason for the increasing water level. So my answer is pump it out of Devils Lake. I'm 73 years old now and 25 years from now, there will be a big time water wars to the Western States. Deserts are deserts that means ~~great~~ golf courses in them. ridiculous to pump precious water in canals. Farmers in Dakota drain water to grow more crops. Bad, don't drain them.

(3)
after getting there crops,
they hold them until
government gives subsidy
On many time people
in parts of world please
to death because corn
& wheat is not available
to them. This whole
world has gone crazy

Thank you
Ted Nealsen

P.S. I'm sorry I
cannot participate.
