As a lover of the Earth, I don't think N. Dakota should be allowed to drain any amount from the Missouri River. It would ruin the habitats of all the wild critters along the river. And you can't tell me that once they started the process, they would discontinue if it was not healthy for the river. They sound very determined. And, what would it do to my drinking water here in St. Louis County? Missouri River should not be dammed or drained, it should be left natural.

Thank you. Marianne P. Mazzola, 2741 Cathedral Drive, St. Louis, MO 63129. Phone 314-894-1397.
