Subject: Comment on SDEIS

Gentlemen & Madams,

As a citizen, environmentalist and Missourian it is my respectful and sincere belief that the GDR project to divert Missouri River waters to develop aspects and conditions in East & Central North Dakota is yet another misguided manipulation of an already badly abused waterway (the Mo River).

The fact that N.D. has done preliminary construction & planning in anticipation of additional abuse & diversion from this precious resource (Mo. River) is of no consequence as compared to the consequences derived from such a foolhardy project.

Please, please let what is left of
this once glorious stream alone &
let it go back to its natural ways

How can you choose to benefit the
wishes of one state (N.D.) at the loss
handed to another state (MO).
Who & from where does man get the
authority to choose to favor one
group at the suffrance of another.

Leave what is left of that poor river
alone. Let it try to survive & become
natural again on its own & as God
gave it to us. Enough is enough!

Please do what ever you can to stop
any further diversion of this rivers
waters & of the six options or alternatives
select & choose to do nothing - no action
to enhance the Red River Valley to the
detriments of the Missouri River Valley.

Thank you

John J. Riemer
